**Subject:** RE: Public Safety question

Nothing came to mind when I read your request. Honestly I wondered if there were actually an alley there as I tried to figure out where the railroad tracks were.

I had my data base queried. I asked for all reported crashes at the four intersections of 4<sup>th</sup>, 5<sup>th</sup>, Lincoln and Charnelton to bracket the alley. If there were crashes at the alley, the formal report may have tied the location to the nearest intersection. In three years of data I find no crashes connected to either of the 4<sup>th</sup> intersections. I had a total of nine crashes in 3 years at the two 5<sup>th</sup> St. intersections. 6 were angle crashes, two rear end and one was turning movement. To have 5 crashes in 3 years (5<sup>th</sup> and Charnelton), two of which were rear end, is not a hot spot for crashes.

I checked with several staff members and they too are unaware of any historical safety problem or on-going issues we are aware of at the alley.

Hi Tom,  
City Council asked that we report back on safety issues regarding West 4<sup>th</sup> Alley between Lincoln and Charnelton. They were looking for both traffic issues (wrecks) or bike/ped conflicts with traffic (as well as other public safety issues which I am checking with the police on. Do you guys keep any stats that would confirm or deny if there are issues in that area. Wasn't sure who to bug so I started with you. Thanks,  
Steve O.

Carter,

As mentioned in our discussion earlier, we were unable to provide statistics within the alley between Charnelton & Lincoln, 4<sup>th</sup> & 5<sup>th</sup> because officers typically assign incidents to the nearest address or intersection.

Attached is both a Map of the area queried as well as a breakdown of Citations and Arrests according to DPSZ categories (drug, marijuana, property, public order, traffic, violent, other). You will also find the total number of "CFS by Address".

Please let me know if you have any questions.

Jeremy
